

# Komfort in collaboration with Oktra

A SHARED VISION

# A shared vision to create unique and memorable spaces

With the recent launch of Komfort Partitioning's future vision, the team is delighted to announce their new working relationship with Oktra, one of the UK's leading office Design and Build companies.

Having collaborated with Oktra in fitting out their stunning new London HQ, Oktra and Komfort ignite a shared passion for creativity and designing unique and memorable interiors.

# Where knowledge, creativity, passion and vision work together

Challenging boundaries and  
setting new benchmarks for how  
commercial interiors will work for  
future generations.

Located in the heart of Clerkenwell, the new workspace is designed to be people-centric with Komfort and Oktra working together from the initial concept.

From the outset, it was important to Komfort to realise how Oktra intended the occupants to use, move and interact throughout the space, along with technology, acoustic, wellbeing and safety considerations.

## The brief

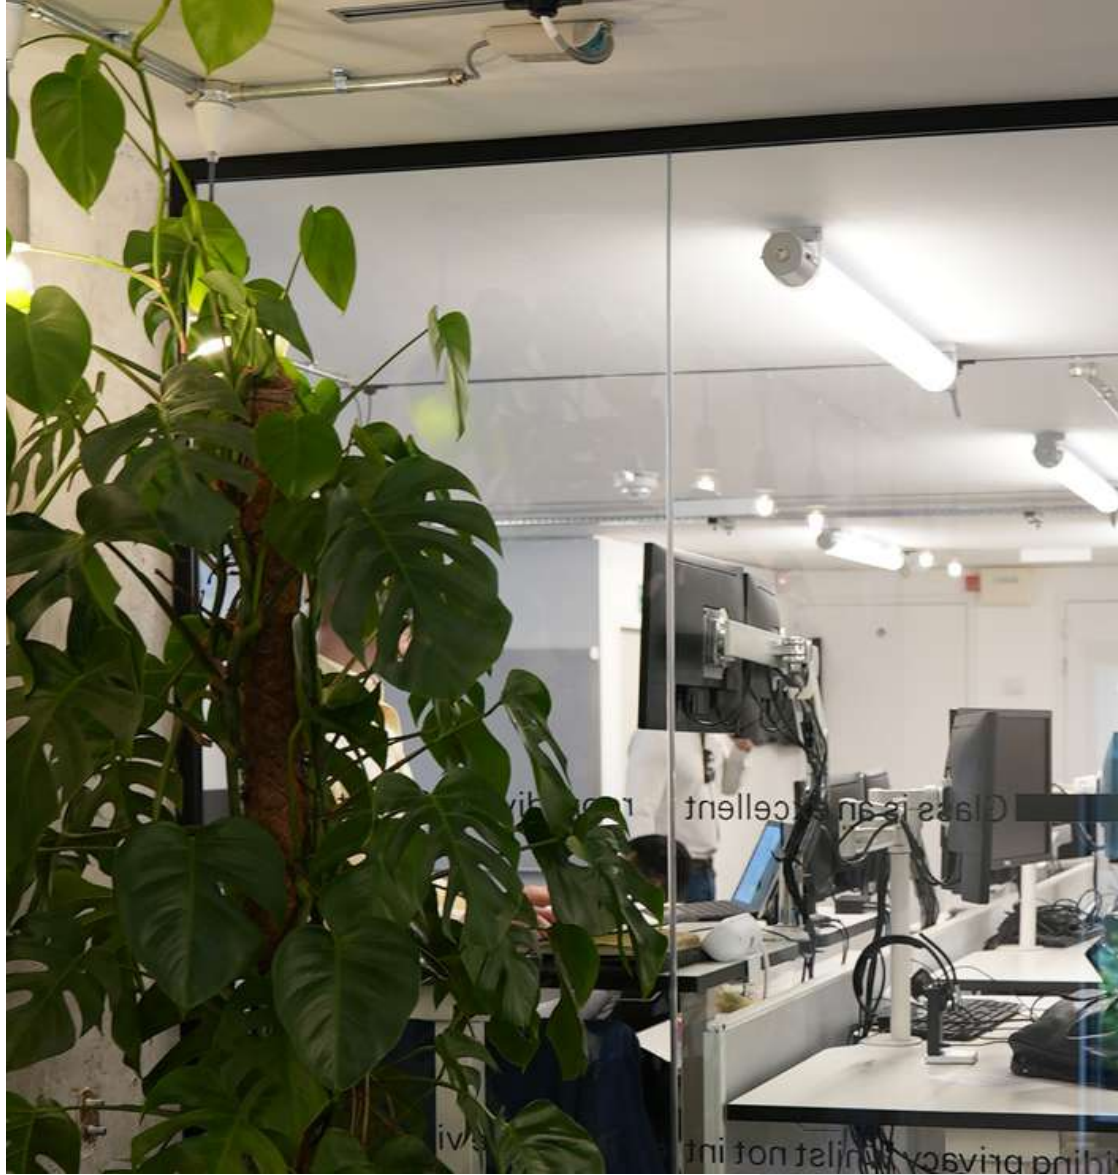

# A showcase

As part of the fit-out, Oktra have showcased Komfort's enhanced Polar partitioning range and latest door systems to help unite and accommodate different working styles and to maintain a bright and open space.

Each system complements the people-centric design brief, maximising the feeling of openness and offering leading performance.

## Polar 30

Komfort's minimal and discreet single glazed system which creates a seamless appearance and naturally brightens any room. It can be used with a range of configurations to suit flexible design requirements.

Achieves acoustic ratings of up to 40dB (Rw).

## Polar 54

Offers flexible design solutions with both single and slimline double glazed options. The frameless bubble jointed glazing and minimal trackwork create a stunning environment for any interior.

Achieves acoustic ratings of up to 47dB (Rw).

## Polar 100

Komfort's acoustic double glazed system combines contemporary aesthetics, elegance, and performance with intricate detail and intelligent design. Ideal for creating private spaces within busy working offices.

Achieves acoustic ratings of up to 53dB (Rw).

# Partitioning

# Doors

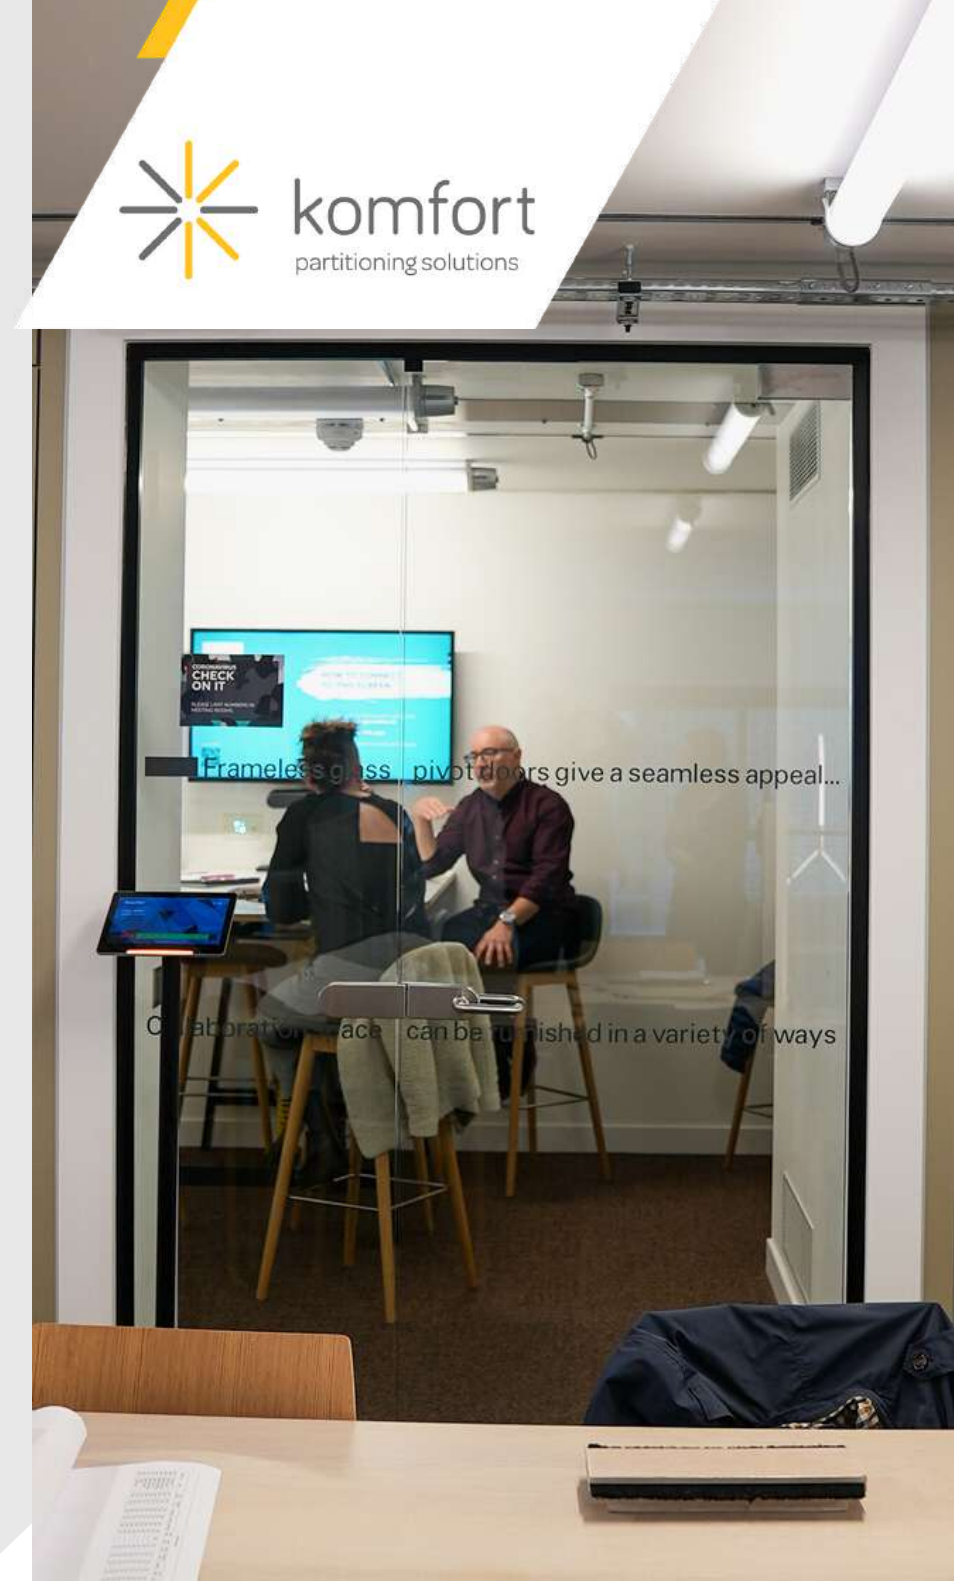

## Sonik

Acoustic glazed doors that can be used in conjunction with Komfort's partitioning systems. Designed with an automatic drop-down seal that maintains acoustic integrity.

## Sonik Slide

Acoustic pocket double glazed sliding door that allows unlimited possibilities to divide spaces and intelligent space-saving benefits.

## Frameless Glazed

The discreet finish increases natural light, allows for uninterrupted views and creates a clean and contemporary finish.

# SwitchGlass

In a busy environment, privacy is vital. As an alternative to blinds, Komfort's SwitchGlass offers privacy to the fullest extent using visually enhancing and space-saving technology.

Komfort's SwitchGlass can either be face applied to a range of glass types or integrated within a bespoke laminated glass.

This technology was installed in Oktra's boardroom to both the glazing and door to offer the ultimate privacy.

Komfort's industrial style glazing brings an intriguing and characterful way of dividing open-plan spaces into beautiful private areas with an Art Deco aesthetic. When balanced with contrasting natural materials, exposed brickwork and biophilic design, Kross Glaze comes to life.

Komfort's Kross Glaze system allows designers to be creative with the glazing and panes and is available with reeded glass. This system is ideal for integrating tech panels for room booking systems and more.

Kross Glaze was installed in Oktra's Radiant room to create a feeling of serenity and escapism.

## Kross Glaze 600

"Collaboration is a massive part of Oktra, and when we are looking for partners, we want people that we can work very closely with and rely on."

Claire Elliott, Group Technical Design Director - Oktra

# The future

Within the Design and Build and Specification Interiors market, Komfort collaborates to pioneer exciting change. This partnership demonstrates a hugely pivotal time for Komfort as we expand and develop within this exciting and dynamic market.

## See for yourself

Oktra's London HQ is a true reflection of their reputation of creating brilliant places for people to work. If you would like to visit Oktra's new office for a closer look at our systems, please contact our London Specification team and we can arrange a visit.

# Get in touch

If you would like any support for your partitioning requirements, the Komfort design-led Specification team would love to hear from you.
