configuration / specification

Flexi Glaze is the latest addition to our moveable wall product range with a modern change to the traditional solid panels available (Komfort 80 & 200). Flexi Glaze adds adaptability and variety to the office environment, whilst ensuring that high acoustics and wellbeing are promoted through full height glazed panels.

Flexi Glaze works in conjunction with our other Komfort partitioning products, achieves superior sound insulation and is fast to install. This is a bottom roller system with a floor track and top guide rail, which allows for end-fold stacking configuration on either one side or both sides of an opening.

Think partitioning, think Komfort.
