

Hideaway Jazz Cafe

Location:
London

**Contractor/ Project
Manager:**
Interco Projects Ltd

Designer:
Paul Mullins

Komfort Product:
Polar Single Glazed
Polar Double Glazed

Background:

Hideaway is home to the very best Jazz, Funk, Swing and Soul music. Hideaway is a fully licensed restaurant, jazz bar and café and holds weekly comedy nights in South London. In 2012 it was decided to turn the basement into a fully functional workspace. Komfort's products were installed by Interco Projects to transform the discounted space into an open plan, creative working environment.

The Building:

The open plan basement covers 7,000sq ft. of workspace, and sits directly below the Hideaway Jazz Club and Café complex. Hideaway Workspace is now a community of small businesses and individuals who benefit from

working with other like-minded individuals. Hideaway is minutes from London Bridge, and is situated at the centre of both London's working and night life.

The Brief in Brief:

Interco Projects and Paul Mullins were briefed to create stylish, open plan work space offices which encourage co-working. The full scope of work included a stylish, spacious business lounge, office suites, meeting rooms, kitchens, breakout areas, hot-desking and clean and bright features. A mixture of black, white and orange were used to continue the Hideaways brand colours throughout the venue.

Komfort's Solution:

To help meet this dynamic brief, the outer part of the workspace, the meeting rooms and offices were fitted with Komfort's Polar systems.

Double glazed Polar's simplistic method of installation, relocatability and powerful acoustic properties made it an intelligent option for this fit-out. The dry bubble joint and to offer a discrete glass to glass meeting style, and framework of double glazed Polar combines contemporary aesthetics, elegance and durability. Whilst, Polar single glazed minimalist form is designed with the minimum of components, thus facilitated speed of erection without compromising structural stability and rigidity. The patented bubble joint ensured a virtually frameless system with no vertical posts between modules, corners or three-way junctions.

The End Result:

The remarkable project was completed to brief. Hideaway Workspace has been designed and built to create a bright, open and creative environment which is now home to a diverse and creative mix of people. It has become the perfect place to captivate a client, encourage collaboration and inspire work and ideas.

Komfort were delighted to be part of such an exciting project and thoroughly enjoyed working with Interco Projects, as always.

Think partitioning, think Komfort.
