

## MediCity Nottingham

**Location:**  
Nottingham

**Contractor:**  
Roshal Space Consultants

**Komfort Product:**  
Firescreens

### Background & Building

Situated within an Art Deco Grade 1 listed building is MediCity Nottingham, the pharma incubator. MediCity is a collaboration between Boots and BioCity, the UK's leading life sciences incubation business. To provide and encourage a stimulating and supportive business development environment for innovators, their premises was completely refurbished.

### The Brief in Brief:

Hot desks and "pods" were designed and installed to create a flexible working environment for individuals or small teams. The facilities include laboratory and office space, access to high-end equipment, shared services, training, business support and access to investment. Aligning to the purpose of the facility, building performance was a key aspect of the brief.

### Komfort's Solution:

With the intent of meeting performance requirements, Komfort's glazed Firescreens were installed in the reception area. Komfort's technical and project management teams worked closely with the design team to provide a solution to fully glaze the reception area from floor to ceiling.

Our specialist internal glazing and firescreens provide a fire rating of up to 2 hours, along with sound and structural performance. Utilising thin glass, minimal framing and exceptional structural performance the specialist internal glazing and firescreens are unique, combining aesthetics with performance.

### The End Result:

Komfort thoroughly enjoyed being a part of the design process and working so closely with Roshal Space Consultants. The building now serves the purpose of providing an ideal and inspiring environment for both start-up and established companies to grow and achieve success, whilst adhering to building performance requirements.

Think partitioning, think Komfort.
