Think Partitioning,
Think Komfort

Edition **1**

Envision enable enjoy

Expressive, meaningful and inviting design is about creating spaces which energise and visually inspire individuals to think differently. Accents of bright colours, the use of different materials, shapes and interactive elements are commonly featured within today's architectural designs to form an interesting and diverse appearance.

The Komfort Konzept range allows designers to truly design; to transform interiors into something quite spectacular and to make a space not just practical yet beautiful, creative and inspiring. The scope of what is possible is almost endless. Be inspired by our portfolio and transform glass partitioning into something with depth and interest.

Mesh

Add character, intrigue and surprising beauty to your space with our mesh panels. Designers are embracing the varied stylistic qualities of mesh, enhancing the architectural features of a room and adding another dimension of texture. Not to mention the added varying degrees of privacy that mesh panels can offer.

Spaces that require high acoustic performance don't have to compromise on design. Using Polar 100's specially designed snap-in profile, Komfort's double glazed partitioning can accommodate mesh panels of any style, texture and colour between the panes of glass to complement or add contrast to any interior. Manufactured with creativity and flexibility in mind.

LED Glass

Set the scene and uplift any space with the beauty of our LED lighting. Different colours, intensities and styles of the LED Lighting can be incorporated into partitioning systems to reflect brand colours and create a calming yet impactful space.

With intelligent design, Komfort offer two LED technology systems to bring a space to life. The first is Komfort's LED Halo system which involves fixing a LED strip around the perimeter of the glazing channel prior to the glass being installed, creating a 'halo' effect. The second is Komfort's LED Captivate system, which combines state-of-the-art glass technology to transform the glazing into a large TV screen to present static and moving content. Best used in public spaces including reception areas, this system is the ultimate way to captivate an audience.

Komfort|Koncept

Curved Glass

Curves are used in design to connect elements within a space and when combined with straight lines create a unified whole. Used to perfectly balance a setting, Komfort's curved glass brings a sense of creativity to a space, as well as making any interior stand out from the ordinary.

A curved effect can be created using faceted flat glass panels, but Komfort's partitioning system is designed to allow you to specify curved glass to create a truly seamless and high-end appearance to elevate any design. This specialist solution is designed and manufactured by us to the highest standards of quality.

Manifestations/Digital Printed and Etched Glass

Complement interior decor, brand identity and natural lighting with Komfort's manifestations, digitally printed and etched glass. These additions uplift spaces into imaginative environments, whilst also providing a degree of privacy to meet safety regulations and allowing light to be shared.

Visually inspire with limitless designs, colours and styles. For manifestations the printed design is adhered to the glass; for digitally printed glass the design is printed directly onto the glass; for etched glass the designs are etched into the glass. Bring glass partitions to life in a completely unique and characterful way.

SwitchGlass

In a busy environment privacy is vital. As an alternative to blinds, Komfort's SwitchGlass offers privacy to the fullest extent using visually enhancing and space saving technology.

Experience instantaneous privacy control through Komfort's SwitchGlass technology, which can either be face applied to a range of glass types or integrated within a bespoke laminated glass. The glass changes from opaque to clear instantly at the flick of a switch, creating the feeling of seclusion.

Stained Glass

Inviting traditional design and Art Deco aesthetics with a modern interpretation, Komfort's stained glass can create interesting shades of colour and a sense of fun, whilst also providing a degree of privacy.

For a powerful design which stands the test of time and helps control light flow, Komfort's stained glass can be specified with any of Komfort's glazed partitioning systems, looking particularly striking with Kross Glaze.

Komfort|Koncept

Magnetic and Whiteboard Glass

Encourage employees to release their creativity, share their ideas and collaborate amongst each other using Komfort's magnetic and whiteboard glass. This elegant system helps to create a flexible and adaptable working environment by eliminating the requirement for drilling holes and hanging whiteboards.

Ideal for break-out areas and meeting rooms, this interactive glazing system is available in a range of colour options, helps heighten imaginations and form a greater sense of community.

Komfort|Koncept

Kross Glaze 600

Komfort's industrial style glazing brings an intriguing and characterful way of dividing open-plan spaces into beautiful private areas, with an Art Deco aesthetic. When balanced with contrasting natural materials, exposed brickwork and biophilic design, Kross Glaze comes to life.

Komfort's Kross Glaze system allows designers to be creative with the glazing and panes and is available with reeded glass. This system is ideal for integrating tech panels for room booking systems and more.

Komfort|Koncept

Komfort's partitioning systems achieve the highest performance credentials and when complemented by the Konzept range, they serve much more than just a practical solution. Allow your imagination to run free and whatever your idea, however conceptual, get in touch with one of our advisors today to realise your vision.
