Paint/ finishes

✓ Polyester powder coat

✗ Satin anodised aluminium

✓ Special anodised finish

* dependent on system configuration / specification

Sonik is Komfort's acoustic glazed door which can be integrated within all Komfort's partitioning systems. Designed for ease of installation and future product maintenance, this system also ensures high acoustic insulation is maintained through the use of an automatic drop-down seal.

The manufactured door set can be specified as a single, hospital or double door set with either lift-off hinges or with an offset pivot and floor spring.

The Sonik door range is available with many configurations through improved profiles and ironmongery sets. There are three door profiles available, including 52mm double glazed, 70mm double glazed and 70mm single glazed. This flexibility in design provides better suitability for a wide range of designer specifications.

Think partitioning, think Komfort.
